Whom May It Concern,

SUB: Solar Water Pumping system.

Dear Sir,

We thank for the kind courtesy extended towards DEEPTEC Engineering to offer valuable offer for Solar Water Pumps.

DEEP TEC Engineering is one of the most prominent water pumping service company in Sri Lanka. We deal with major brands of residential, commercial & industrial solar water pumping equipment's. We have great power in importing, representing and supporting in the water pumps and pressure systems sector for domestic, industrial and agricultural use.

We focus on the complete water system equipment's including drilled water well, fully customizable water well pumping system, tank storage and solar power pump installations that always include our never-ending professional customer support.

Deep Tec engineers are geared up to give you a fast, efficient 'on-site' service for breakdowns, routine maintenance and installation. We have the equipment and experienced personnel to get the job done right, professionally and on time. We offer competitive prices and will work with you to provide what you need at a price you can afford.

Technical Specifications For Solar Water Pump:

System Description	Solar Water Pump
Solar Capacity	As Per Requirement Drive
Capacity	As Per Requirement Pump
Capacity	As Per Requirement
Module Specification	As Per Requirement

NOTE:

Time required for physical completion of work from the date of receipt of Purchase Order- 30 Days

Special Features Of The Product:

- AC/DC Hybrid Pump
- Corrosion-resistant Submersible pump & Accessories
- High reliability, even when exposed to extreme weather conditions
- User friendly function and very low maintenance
- High performance MPPT charge controller inbuilt
- Automatic operation for all conditions
- Very high-performance circuits and components

S.No	Description Of Product
01	Submersible water Pump, Mounting structure, PV Module, Solar Pump Drive Controller And accessories
